- Python

WORK EXPERIENCE

Software Developer (Frontend)   December 2021 - Present
inFeedo, Remote

- Pioneered the creation of a cutting-edge report generation framework that autonomously generates high-level CXO reports from the ground up, complete with a user-friendly interface. This innovative system reduced report creation time by an impressive 40% and increased adoptions as compared to old reports by 30%.
- Played a pivotal role in the enhancement of the internal design system, including components such as buttons, graphs, and more, leading to a 15% increase in overall design system efficiency and a significant reduction in development time for UI elements.

Graduate Engineer Trainee   June 2021 – December 2021
Adani Enterprise Pvt Ltd, Ahmedabad, Gujarat

- Managed team of outsourced engineers in developing an e-auctioning website for Adani intelligent mines project and successfully hosted 3 E-auctions in 4 months.
- Rolled out MFA authentication layer with help of vendor (RSA) to over 25k Adani employees.

Software Intern   January 2021 – June 2021
Bentley Systems, Remote

- Learned the concept of WebGL and developed a printable HTML render of Tower design using 3D coordinates and Three.js.
- Learned and used Twin js for 3D rendering and editing towers on OpenTower IQ cloud Application.

ACHIEVEMENTS & POSITION OF RESPONSIBILITY

- Achieved Brown Belt status at inFeedo in March 2023 by exceeding performance expectations through strategic initiatives that boosted customer satisfaction by 25% and added revenue.
- Tech Conqueror award for best engineer from inFeedo in December 2022
- Best Problem Solver Award from Deshpande startups Virtual Hackathon – Solve for future in September 2020
